The Cancer Risk Assessment Program

can help cancer patients, their physicians, and their families more accurately assess cancer risk and develop a strategy for cancer prevention.

The Program is a multidisciplinary consultation service offered through the Johns Hopkins Oncology Center. Individuals can be physician or self-referred.

A consultation includes:

A detailed analysis and evaluation of the family medical history

A discussion of the genetics of cancer development and specific hereditary cancers

An assessment of the individual's cancer risk based on family and/or personal history of cancer and other risk factors

A list of recommendations for cancer screening, prevention and detection

An optional medical evaluation and physical examination

If an individual's personal or family history suggests a hereditary cancer syndrome, a member of our team of specialists will discuss the risks and benefits of genetic testing. In some cases, a test can be performed on the same day as the initial consultation.

The Johns Hopkins Cancer Risk Assessment Program

Helping physicians and families fight cancer before it starts

Who Can Benefit from a Cancer Risk Assessment?

- People with multiple primary cancers
- People with cancer at an unusually young age of onset
- Members of families with a clustering of rare or unusual cancers
- People with cancer associated with a known genetic condition, such as:
  - *-Neurofibromatosis*
  - *-Fanconi Anemia*
  - *-Tuberous Sclerosis*
- People with known cancer susceptibilities, such as:
  - *-Hereditary Nonpolyposis Colorectal Cancer*
  - *-Familial Adenomatous Polyposis*
  - *-Hereditary Breast-Ovarian Cancer Syndrome*
  - *-Li-Fraumeni Syndrome*
  - *-Von Hippel-Lindau Syndrome*
  - *-Multiple Endocrine Neoplasia*
- Ashkenazi Jewish people with an interest in genetic testing for familial cancer.
- People with one or more first-degree relatives (parent, sibling or child) affected with cancer or any of the genetic conditions listed above

Answering questions about your risk for developing cancer

How to Schedule an Appointment...

The Cancer Risk Assessment Program is comprised of three specific services. All are located on the East Baltimore campus of Johns Hopkins Medical Institutions. For more information or to schedule an appointment please call the Cancer Risk Assessment Program at *410-614-6319.*

Helping physicians and families fight cancer before it starts

Breast and Ovarian Surveillance Service (BOSS)

This service provides genetic counseling and risk assessment to people with a personal or family history of breast and/or ovarian cancer.

Colon Cancer Risk Assessment Service

This service offers genetic counseling and risk assessment services to individuals with a personal or family history of colorectal cancer.

Familial Cancer Service

This service offers risk assessment and genetic counseling services to individuals who are concerned about their family history of cancer and/or their personal cancer risk. Familial conditions might include: familial melanoma, familial pancreatic cancer, Von Hippel-Lindau syndrome, Gorlin syndrome, retinoblastoma and familial prostate cancer.
